

Dear ASCE Student Chapters:

Please allow me to introduce myself: my name is Stuart Albrecht. I am the Director of the academic outreach program from Bentley Systems, called the BE (Bentley Empowered) Careers Network.

Supporting key academic institutions and civil engineering students is a strategic initiative at Bentley. We are proud to co-sponsor the ASCE National Concrete Canoe Competition in 2005-2006. This partnership will benefit all parties involved.

Bentley is pleased to offer the following engineering/CAD software and tools to your student chapter:

- MicroStation V8 2004 Edition (\$4,600 commercial value)
- Training materials to help you use MicroStation to build your concrete canoe (PowerDraft Student Guide and Canoe Modeling Tutorial).
- 8 month license that must be installed for MicroStation to run properly.

To request the CD, teams should e-mail becareers@bentley.com with a subject line of "ASCE Concrete Canoe Competition Request." In the e-mail, please provide the ASCE Chapter President's name, university name, and full mailing address.

Bentley Systems, Incorporated provides software for the lifecycle of the world's infrastructure. The company's comprehensive portfolio for the building, plant, civil, and geospatial vertical markets spans architecture, engineering, construction (AEC) and operations. With 2004 revenues exceeding \$300 million, Bentley is the leading provider of AEC software to the Engineering News-Record Design 500 and major owner-operators.

Best of luck in the ASCE National Concrete Canoe Competition!

Sincerely yours,

Stuart Albrecht
